How to FORWARD Ur New domain name at GoDaddy.com

1) Log in to Ur account at www.GoDaddy.com

3) In the DOMAINMANAGER Select the Domain that U want to forward. In this case I am selecting HEADLINEAGE.COM U may only have one choice here?

 Forward Only Redirect type: I am only temporarily forwarding my domain.

5) The pop up menu for forwarding will open! Here copy and paste in the URL that U want folks to be re-directed to when they type in Ur new domain name.

For example <u>www.HeadLineage.com</u> will now send folks to <u>http://teambeachbody.com/get-fit/supergym/workoutgroup/detail?group=10828560</u>
